Revolt LED introduces our new LED Ecco Link Lightbar. The Ecco Link LED Bar is one of the brightest and most efficient LED linear systems out in the market. At 4.3 Watts per foot, the Ecco Link LED bar provides equal to 30 Watts of incandescent light per linear FT. This Low wattage LED system is a great alternative to halogen linear systems providing over 50,000 hours of light, with minimal heat. Up to 12 FT of Ecco link Lightbars can be joined together, while still using only one 24V power source. **Revolt LED** Lightbars are joined end-to-end using connectors for a seamless light source. Fully dimmable, this highly adaptable Lightbar fits great under shelving, cabinets, displays, accent lighting and more. Our adjustable mounting brackets are a great way to angle the LED bars, which is ideal for display cabinets and kitchen back splashes. UL listed.
