

12133 INSTALLATION INSTRUCTIONS

START HERE

- Make sure power is completely off at the fuse box.
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in clear area.
- Wear gloves at all times during this installation.
- Read instructions carefully before you start assembly.
- Keep this instruction sheet for future reference.

Please Note:

- All LED fixtures come with pre-wired LED module(s).
- Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
- For dimming, an ELV (Electronic Low Voltage) dimmer is required.

1. Remove the fixture from its original packaging and remove the fixture mounting plate from within the hardware package.

2. Attach the fixture to the mounting plate, which is attached to the electrical junction box on the ceiling. First attach all wiring (2a) with the provided marrets (white to white "N", black to black "L", ground to ground "G"). Using the two machine screws (2b) thread the mounting plate to the junction box. If desired, adjust the cables (2c) and adjust to a maximum of 72 inches. Once this is complete you can thread on the decorative nuts (2d) to the two studs until the fixture is secured to the ceiling.

3. You have now completed the installation of your fixture, enjoy.
