Capabilities Statement

Whisler Electric LLC is an electrical contracting business. Established September 2009 in Pennsylvania, the company provides quality services to the central Pennsylvania area including residential, governmental, and commercial businesses. We are specialists in the electrical contracting field. Whisler Electric LLC prides itself in quality workmanship; enthusiastic employees' and prompt attention to our customers' needs, we seek long term relationships with our employee's and our customers.

Whisler Electric LLC is willing and able to provide for all your electrical needs. Whether it is for your home or business, Whisler Electric LLC offers the most modern state of the art lighting fixtures, lighting controls, power distribution equipment, camera systems and access control. Through our line of electrical suppliers and qualified electrical workers, we offer new installation, renovations, upgrades, restorations, and can even help in designing and planning your electrical installation.

What we feel is important to a project:

- **Safety We have a .85 EMR**
- **Clean Job site**
- **Competitive/complete pricing**
- **Quick turnaround of general condition requirements**
- **Experienced Foreman who can communicate with the owner, general contractor and subcontractors**
- **Provide schedule input**
- **Complete project close-out documents early**
- **Provide the client a punch list and ensure it is closed out**

Geographically we work in a 50 mile radius of Harrisburg Pa.

Licenses held:

- **Harrisburg, Pa 00000829**
- **Chester Pa**

Key personal:

Brian M. Stright - Owner/Manager

Brian Stright - Master electrician licensed in the City of Harrisburg (#00000829) and has been in the electrical construction industry for 29 years with experience in field installation, management, estimating, design, and sales. The majority of his experience is in commercial construction, government, educational and health care new construction and renovation. Brian began his career working in the field as an electrical apprentice then a journeyman and after three years began his management positions as an estimator, followed by project management then eventually overall management of the commercial electrical division.
