- **Avoid Wet Conditions:** Do not handle an energized fixture or attempt to energize any fixture with wet hands or while standing on a wet or damp surface or in water.
- Do not install in a hazardous atmosphere, except where the ambient temperature does not exceed the rated operating temperature of the fixture.
- **Verify Power Source:** Ensure the power source meets the fixture's requirements.
- Use only UL (or other NRTL) approved wire for input/output connections.
- Keep tightly closed when in operation.
