

## INSTALLATION INSTRUCTIONS

### Surface Mount

Disconnect power source prior to installation.

- It is recommended to install with more than one person.
- Use only with a Class 2 Power Unit.

### SAFETY

Read all instructions before installation.

**These products may represent a possible shock or fire hazard if improperly installed.**

**Do not** install less than 6 inches from a combustible material.

Product should be installed by a qualified electrician.

Product should be installed in accordance with these instructions and current electrical codes.

IP67 / IP68 is not Field Cuttable

Product is 24V. Do not connect to 120V power source.

## INSTALLATION

**STEP 1** Determine the layout and mark the pattern onto the intended surface

**STEP 2** Align the spring clips to the mounting holes in the channel and place mounting channel to the surface. Use a level to make sure the channel is straight. Place a mounting bracket minimum every 8".

*\* The number of brackets may vary depending on your pattern.*

**STEP 3** Secure channel to the surface by tightening all the provided screws; starting at the power input end. Make sure to keep a distance between the power input and channel.

*\*If mounting to a non-wood surface, it is recommended to use proper hardware.*

**STEP 4** Secure the strip into place by carefully pushing the light strip onto the channel or mounting brackets.

*\*Please do not bend product beyond factory recommendation. (Refer to product spec sheet for factory bending limits.)*

**STEP 5** Connect the LED supply wires to the source wires. Match the polarity.
