

INSTALLATION INSTRUCTIONS

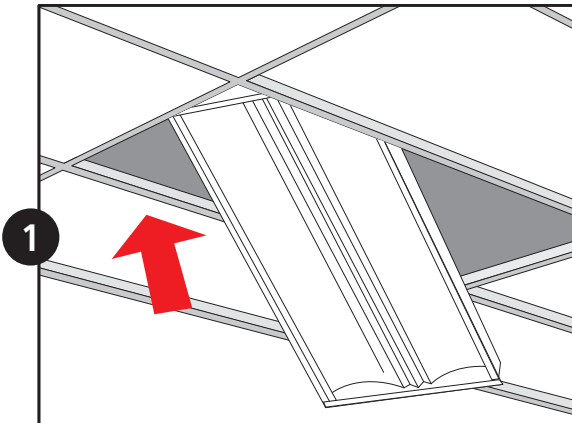

WARNING:

RISK OF FIRE AND ELECTRICAL SHOCK. FIXTURE MUST BE INSTALLED BY A QUALIFIED ELECTRICIAN ONLY IN ACCORDANCE WITH NATIONAL, LOCAL BUILDING AND ELECTRICAL CODES. DISCONNECT POWER AT ELECTRICAL PANEL BEFORE SERVICING.

PLEASE READ ALL INSTRUCTIONS BEFORE ATTEMPTING INSTALLATION

- **Electrical Compliance**
 - Ensure that all electrical wiring complies with the National Electrical Code (NEC®) and any applicable local regulations.
- **Qualified Personnel Only**
 - Installation and maintenance should be carried out exclusively by qualified service personnel.
- **Placement Restrictions**
 - Do not install this equipment near gas or electric heaters.
- **Mounting Location**
 - The equipment must be mounted at a height and location that discourages tampering or access by unauthorized personnel.
- **Approved Accessories Only**
 - Use only manufacturer-recommended accessories. The use of unapproved components may result in unsafe conditions.
- **No Modifications**
 - Any modification or use of non-original parts will void the warranty and release the manufacturer from product liability.
- **Intended Use Only**
 - This equipment is to be used only for its intended purpose. Misuse may result in safety hazards and operational failure.

1. Insert the Fixture

Lift the fixture upwards into the ceiling cavity, then lower it gently into the ceiling opening.

2. Seat the Fixture

Allow the fixture to rest securely on the ceiling grid.

3. Secure with Earthquake Clips

Integrated earthquake clips are built into the fixture body. Bend them outward as needed to provide additional support and protection.
