

**INSTRUCTION SHEET**

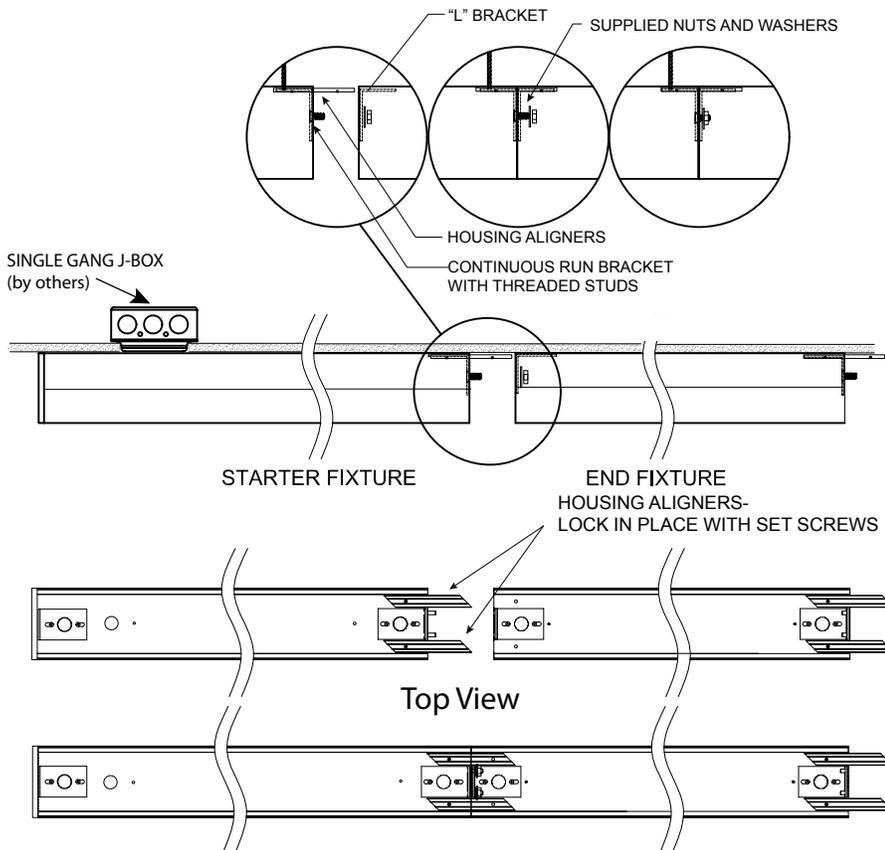

SM - Surface Mount

1. Install J-Box (by others) with single gang mud ring horizontally mounted, or other suitable UL approved J-Box. Alternately a whip with a UL approved conduit snap-in flex connector can be stubbed out of the mounting surface, provided by others.
2. Remove lens and internal reflector.
3. Determine fixture location on wall and note/mark the center of the J-Box/whip on the fixture.
4. Drill appropriate size hole to feed wire into fixture - DO NOT DRILL INTO POWER SUPPLY - Relocate power supply if necessary - insert bushing (by others).
5. Drill mounting support holes near ends of fixture - support method to be determined by contractor.
6. Complete wire make-up.
7. Securely mount fixture to surface.

**For Continuous Run:**

1. Install starter fixture and power
2. Install next fixture - cable, power feed if necessary.
3. Slide open end of fixture over starter fixture's continuous run bracket studs.
4. Secure with supplied washers and nuts (Note: the internal "L" bracket should be set back approximately 1/16" from the edge of the fixture - they can be adjusted if necessary).
5. Tighten set screws on housing aligner.
6. The connection is pins and pinch brackets.
7. If integral power supply, thru wire with appropriate gauge wire
8. Continue installation with all other fixtures.

**Note:** To be installed by a qualified electrician per N.E.C. and all local codes.
