Shade Pendant Light by FLOS Lighting | YLighting

Design by Paul Cocksedge, 2015.
By FLOS.

The Shade Pendant Light has redefined the word "lampshade" and its fixed perspective. An effortless way to have warm ambience light with a touch of surrealism. The magic of Shade is achieved by avoiding the conventional way of using power from the ceiling and its intrusive fittings. Instead, power derives from an LED floor fitting shining an uplight into the paper shade, which in turn is suspended from the ceiling with next-to-invisible, capillary-thin wires. Paul Cocksedge describes shade as, "an almost dream-like mystery. It utilizes floor and ceiling both, but appears unconnected to either."

Shade's diffuser is made of foldable paper, while the floor light source is made of a black aluminum. Comes with a footswitch button with a dimmer.
