

## LED Exterior Ceiling

### START FROM HERE

- Make sure **POWER** is **COMPLETELY OFF** at the fuse box
- Have your fixture installed by a qualified licensed electrician
- Prepare everything in a clear area
- Wear gloves at all time during this installation
- Read instructions carefully before you start assembly
- Keep this installation sheet for future reference

#### Please Note:

- This Alcon Lighting LED fixture comes with pre-wired LED module(s)
- Unless instructed, Do Not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage
- For dimming, an ELV (Electronic Low Voltage) type of dimmer is required

1. Remove fixture from its original package
2. Separate upper body (1d) by twisting it off fixture body (2a)
3. Secure upper body (1d) to electrical junction box (1a) using junction box screws provided (1e) in hardware package
4. Make proper electrical connections (black to hot "L", white to neutral "N", ground to "GND") with wire nuts (1b) provided in hardware package
5. Secure fixture body (2a) into upper body (1d)
6. To prevent moisture from entering the electrical junction box (1a) and causing a short, seal around the top perimeter between the fixture and the surface with weather resistant caulking (Illustration 1).
