

1. Remove the mounting plate and the cover from the fixture. Place the mounting plate against the wall covering the outlet box, mark placement and drill appropriate sized holes, insert wall plugs into the holes. Attach the mounting plate to the outlet box using two mounting screws, tighten it to the wall plugs with two wall screws.
2. Attach the glass on the fixture's base using two small screws. Choose needed color temperature. Connect the wires: Black to Black, White to White, Ground to Ground. Secure the connection with wire nuts.
3. Attach the fixture to the mounting plate and put the cover on the fixture. Twist three black screws on the top and one screw on the bottom of the fixture. For outdoor locations it is recommended to use silicone (not included) shown in the picture below.
