

12100-41-W INSTALLATION INSTRUCTIONS FOR: Wet-Location Linear Direct and Indirect LED Wall Light

Safety Precautions:

1. This product must be installed, inspected, and maintained by a qualified electrician in compliance with the NEC (National Electric Code) and all applicable local codes.
2. Always turn off electrical power before conducting any inspection, installation, or removal of the fixture.
3. Use only UL or NRTL-approved wiring for all input/output connections to ensure safety and compliance.
4. Ensure that the LEDs and drivers have cooled down before performing any maintenance, and verify that the supply voltage matches the luminaire's rated voltage.
5. Do not install in hazardous environments unless the ambient temperature remains within the fixture's rated operating range.
6. Ensure the fixture remains tightly sealed during operation to maintain optimal performance and safety.

Prepare Electrical Wiring:

Electrical Requirements:

- Ensure that the local voltage matches the fixture's working voltage range.
- Use a minimum 75°C-rated supply wire for safe operation.

Grounding Instructions:

- Ground and bond the entire system according to NEC Article 600 and local electrical codes to ensure safety and compliance.

Safety Precautions:

- Adhere to all applicable safety procedures throughout installation, operation, and maintenance.
- Wear appropriate Personal Protective Equipment (PPE), including hard hats, safety glasses, reflective vests, electrical safety gloves, fall protection gear, and safety-toe boots.

WARNING: RISK OF FIRE AND ELECTRICAL SHOCK. FIXTURE MUST BE INSTALLED BY A QUALIFIED ELECTRICIAN ONLY IN ACCORDANCE WITH NATIONAL, LOCAL BUILDING AND ELECTRICAL CODES. DISCONNECT POWER AT ELECTRICAL PANEL BEFORE SERVICING.
